VOLVO FL SKIP LOADER

Limited availability.

The Volvo FL Skip Loader is compact, highly manoeuvrable and designed for urban environments where space is limited. Perfectly suited for towns and cities, it navigates tight streets and busy areas with ease. Despite its smaller size, the FL still delivers all the reliability, safety, and driver comfort expected from Volvo—just in a more versatile and agile package, ideal for demanding skip operations in built-up areas.

Boughton's Power-Reach skip loader range, introduced in 2013, marked the first comprehensive ground-up design review and whole concept development programme for a generation. Boughton also undertook an exhaustive research and development programme, which included wide consultation with industry and operators. As a result, Power-Reach offers improved functionality, serviceability and safety features, with greater productivity and operational reliability.

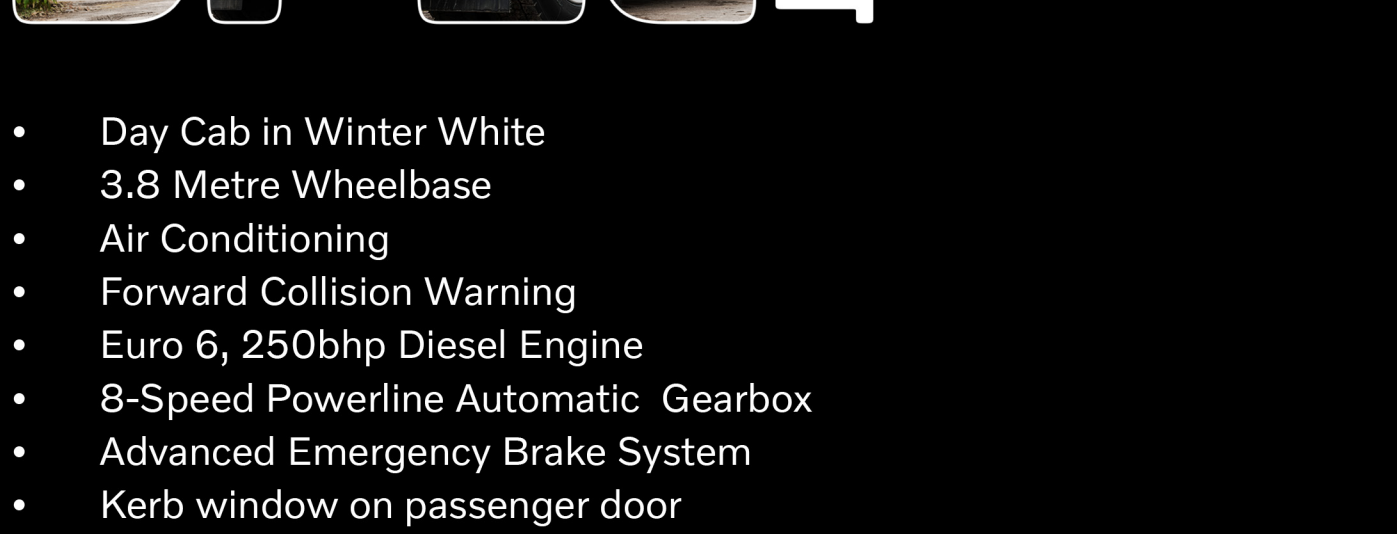

Key Skip Loader Features Include :

- Independent telescopic lift arms
- Fully re-designed hydraulic system, incorporating simple, positive multi-lever hydraulic controls and including "hold to run" and fast off load for empty skips
- Pneumatically operated tip hooks, powered up and down
- Independent telescopic stabiliser legs with the option of pad or roller feet
- Multi position, asymmetric front and side skip stops
- Heavy duty cab guard
- Easy access panels for hydraulic tank and main hydraulic valve chest.
- Front and rear access grab handles
- Rear grab handles also provide sheeter rear locating points
- Inboard and outboard hydraulic cylinder protection
- Heavy duty "walk-on" hydraulic cylinder guards
- Heavy duty removable rear light guards and rear access steps

The Volvo FL interior is designed with the operator in mind, offering a surprisingly spacious and comfortable environment despite its more compact cab. There's ample headroom, and the low cab height makes getting in and out quick and easy - ideal for frequent stops in busy urban settings.

The air-suspended and heated driver's seat ensures comfort throughout the day, while the large cab storage box keeps essentials within easy reach. Air conditioning maintains a pleasant temperature inside the cab, and visibility is excellent thanks to features like the kerb window, electric windows, rear window, and heated mirrors. Safety is also a priority, with forward collision warning and advanced emergency braking fitted as standard. A built-in sun visor adds extra comfort for those long daylight hours on the road.

- Day Cab in Winter White
- 3.8 Metre Wheelbase
- Air Conditioning
- Forward Collision Warning
- Euro 6, 250bhp Diesel Engine
- 8-Speed Powerline Automatic Gearbox
- Advanced Emergency Brake System
- Kerb window on passenger door
- DAB Radio with Bluetooth
- 215 Litre Fuel Tank
- Rear Window
- 32 Litre Adblue Tank
- Electrically Operated & Heated Mirrors
- Vertical Exhaust
- 295/80R22.5 Bridgestone Tyres
- Air Suspended Heated Drivers Seat with Lumbar Controls & Armrest
- Large Cab Storebox
- Electric windows
- Boughton PR18 Power-Reach Skiploader equipment in black with Intacova Auto sheeting
